

Piece for both Welcome Magazine and WELLweb

LOCAL WILDLIFE SIGHTINGS WHATSAPP GROUP

We are setting up a new Whatsapp group in which anyone interested can report wildlife sightings of particular interest. This is yet another project from the CLP Implementation team. Sightings can include both flora and fauna, seen locally in Wellington and beyond in the wider county area. This is as well as the sightings book which hangs from the Parish Council notice board in the village shop foyer. This book has obviously not been used since lock down, so this seems like a good alternative for those people who take an interest in wildlife.

Anyone with an interest is welcome to take part, and join the group, the only suggestion being that it is the more unusual sightings spotted that would be posted.

Title of Whatsapp group: Local Wildlife Sightings, @ 07772 004174

If you would like to join the group, please contact Viv Quinn on 07772 004174 on Whatsapp with your name and number.
